

# Unleashing the Power of AI

Solving Problems,  
Empowering Business

# Challenges Industry4.0

---

- There is a growing need for User friendly AI solutions that don't require specialized expertise.
- Implementing AI for efficient problem solving and data driven decision making .
- Concerns about data privacy.
- Data quality can leads to inaccuracy results and unreliable prediction.

# Our Solution

---

## **1. AI powered database platform:**

- Enables natural language interaction with databases, eliminating the need for database experts.
- Sandbox environment for building, refining and deploying AI models.
- Democratize AI development with pre trained models.

## **2. Digital transformation platform with Generative AI:**

- Empower business to undergo strategic digital transformation using AI and data analytics.
- Leverage generative AI for innovative solutions and process optimization.

## **3. Intelligent Chatbots with Generative AI & Decision Support:**

- Utilizes generative AI for natural and informative chatbot interactions.
- Provides predictive insights and accurate information with decision support systems.
- Can be customized to suit different industries.

## **4. Generative AI for Automotive Industry:**

- AI-powered testing and ADAS development.
- More efficient, time saving diagnostic tools to resolve error.

# Industry Specific Application

## Industrial:

Predictive maintenance, root cause analysis and Future projection for better decision making.

## HealthCare:

Generative AI for helping health care professionals accurate diagnostics, chatbots for patient education and appointment scheduling.

## Automotive

Generative AI in ADAS testing, diagnostics scan tool, production planning, battery health monitoring and design recommendation.

# Competitive Advantage

01

**User Friendly:**

User friendly AI platform with natural language interaction process.

02

**Integrated Functionalities**

On combining AI, Data Analytics, and Generative AI.

03

**Specific:**

Industry Specific Solution tailored to address specific Challenges.

# Business Model

## Subscription

Offering subscription based access to AI platform and AI powered Chabot.

## Industry

Usage based subscription model for specific industry.

# Thank You!
